1 Appliance Template Information

1.1 Installed main products (see appendix for full list)

You get access to a system (landscape) that has been built using the following installation media:

- SAP ERP 6.0 EhP8 IDES Installation Export
- SAP Sybase ASE 16.0.02.08
- DMIS 2011_1_731 SP18 (for data migration scenarios in conjunction with the SAP S/4HANA Fully-Activated Appliance)

2 Accessing the Appliance Template

2.1 Overview

- Appliance template comes as an ERP system only, use your available frontend tools (browser, SAPGUI) to access the system
- Appliance template can be accessed on OS level access if required.

Connect to SAP **ABA** using the information in the table below.

For more information how to connect, see [Connecting to an Appliance](#).

Name	Value	Description
SID	ABA	System ID of the SAP system
CI Instance Number	00	The instance number of the central instance (CI)
CS Instance Number	01	The instance number of the central services (CS) instance.
Password	Master Password	The initial master password of the system you provided in the SAP Cloud Appliance Library when creating the appliance.
Username	DDIC SAP* IDADMIN	Use your <Master Password> for DDIC and SAP* Use password <code>ides123</code> for IDADMIN user in the IDES clients (see below)
Clients	000 / 001 800 Other IDES specific clients	000 and 001 are the standard clients available in a newly installed SAP system. 800 is needed for the data migration scenario in conjunction with the SAP S/4HANA Fully-Activated Appliance. Please refer to the IDES online documentation for IDES specific clients

2.2 Database Server Details

Connect to SAP <SID> using the information in the table below.

For more information, how to connect to the Frontend Server, see [Connecting to an Appliance](#).

Name	Value	Description
DB SID	ABA	Database System ID of the SAP system

Name	Value	Description
DB Type	SYB	Type of the database
Username	Sybase users SAPSSO SA SAPSA SAPSR3DB	These are the standard users which you can use to access the database server.
Password	<Master Password>	The initial master password of the system you provided in the SAP Cloud Appliance Library when creating the appliance.

2.3 OS Users and Groups

Name	Description
abaadm	SAP system administrator
sybaba	SAP database administrator
sapsys	Group containing all SAP OS users

2.3.1 Accessing Your Appliance on OS Level

For information on how to access an appliance on OS level, go to [this FAQ wiki page](#) and check this question: **How to connect to a running appliance via the secure shell protocol (SSH)?**

3 Licenses

3.1 Running Appliance Template as a Trial for a Free Period

This appliance template can be used with a Free Trial License Agreement for the configured free period. You will be asked to agree to the Free Trial License Agreement during the instantiation steps.

Once you create the appliance, the SAP system will generate a temporary license key that is sufficient for exploration purpose. After the expiration of the pre-installed temporary license a valid license is required to keep using the appliance.

Note that you are not allowed to install license keys under the Free Trial License Agreement. You can continue the appliance template with the Product License Agreement any time prior to the end of the free period by unlocking it.

3.2 Running Appliance Template with a Product License Key

To use the appliance created from this appliance template under your own SAP Product License Agreements, you must unlock the appliance template in SAP Cloud Appliance Library. As a prerequisite you must own the required SAP Product licenses and need to purchase the SAP Cloud Appliance Library subscription package. For more information, see [Unlocking Appliance Templates](#).

3.3 License Key Installation

After unlocking the appliance template, you need to apply a valid license key to it. For this appliance template, request and install the following license keys:

SID	Product	Version	DB	OS	Comment
<i>ABA</i>	<i>SAP ERP</i>	<i>6.0</i>	<i>Sybase ASE</i>	<i>Linux</i>	

To check the Product and the Version for your appliance template, go to the SAP License Keys application: <https://launchpad.support.sap.com/#/licensekey>

For information on license key installation and related notes see [this blog](#).

4 Security Aspects

Be aware that creating your appliances in the public zone of your cloud computing platform is convenient but less secure. Ensure that only port 22 (SSH) is opened when working with Linux-based appliance templates and port 3389 (RDP) when working with Windows based appliance templates. In addition, we also recommend that you limit the access to your appliances by defining a specific IP range in the Access Points settings, using [CIDR notation](#). The more complex but secure alternative is to set up a virtual private cloud (VPC) with VPN access, which is described in [this tutorial](#).

The list below describes the ports opened for the security group formed by the server components of your appliance:

To access back-end servers on the operating system (OS) level, use the following information:

Protocol	Port	Description
SSH	22	Used for SSH connection to Linux-based servers
SAPGUI	3200> 3600	Used for SAPGUI and ABAP in Eclipse to establish connection to SAP Application Server

You must change the initial user passwords provided by SAP when you log onto the system for the first time.

For more information about security vulnerabilities, see this [community page](#).

5 Appliance Template Provisioning in SAP Cloud Appliance Library

If you have a user in SAP Cloud Appliance Library, you need to meet the following prerequisites before starting to use the SAP Cloud Appliance library:

- Cloud Provider Configurations

You have a valid account in one of the cloud providers supported by SAP Cloud Appliance Library. If you already have an active cloud provider account, you can proceed directly with the next section. Otherwise, navigate to the cloud provider home page and sign up.

- Navigate to SAP Cloud Appliance Library

Open the SAP Cloud Appliance Library in your Web browser using the following link: <https://cal.sap.com>

For more information about how to use appliance templates in SAP Cloud Appliance Library, see the official documentation of SAP Cloud Appliance Library (choose [Support](#) → [Documentation](#) link and choose  (expand all) button to see all documents in the structure).

You can also use the context help in SAP Cloud Appliance Library by choosing the Help panel from the right side: 

To familiarize yourself how to use SAP appliance templates in SAP Cloud Appliance Library, go to [this topic](#).
