4	Solution Provisioning in SAP Cloud Appliance Library	10

1 Solution Information

This guide provides general information you need to use the solution **SAP Landscape Management on SAP NetWeaver Java 7.50 SP04 on Sybase**.

The SAP Landscape Management solution is in “Early Adopter Care” phase, “General Availability” is planned for **Q1 2017**.

Material Numbers

You get access to a system that has been built up using the following media:

Number	Description
51050829_3	SAP NetWeaver 7.5 Installation Export
51050826_3	SAP Kernel 7.45 Linux on x86_64 64bit
51047759	SAP ASE 16.0.02.01 RDBMS Linux on x86_64 64bit
70001062	SAP Landscape Management 3.0, enterprise edition (VCM01)
VCM01_0-70001062.SCA	SP01 for VCM LVM ENTERPRISE 3.0
70001063	SAP Landscape Management 3.0 SP1, enterprise edition (VCMCR4E01)
VCMCR4E01_0-70001063.SCA	SP01 for VCM LVM CR 3.0
70001064	SAP Landscape Management 3.0 SP1, enterprise edition (VCM_ENT01)
VCM_ENT01_0-70001064.SCA	SP01 for VCM LVM ENTERPRISE 3.0

Components

The solution comprises the following component versions:

Name	Release
AJAX-RUNTIME	1000.7.50.4.0.20160613143100
BASETABLES	1000.7.50.4.0.20160613142800
BI-WDALV	1000.7.50.4.0.20160613153900

Java Application Server Details

Name	Value	Description
SID	J2E	System ID of the SAP system
CI Instance Number	00	The instance number of the central instance (CI)
CS Instance Number	01	The instance number of the central services (CS) instance.
Username	Administrator	The initial password of the master system. Note that for solution provisioning in SAP Cloud Appliance Library the password is reset with the one provided when you create an instance.
	TRIALadmin	The initial password of the master system: Trial2016 Please consider changing this password as soon as possible.
	TRIALoperator	The initial password of the master system: Trial2016 Please consider changing this password as soon as possible.
	TRIALreadonly	The initial password of the master system: Trial2016 Please consider changing this password as soon as possible.

Database Server Details

Name	Value	Description
SID	J2E	System ID of the SAP system
DB SID	J2E	System ID of the database of the SAP system
DB Type	SYB	Type of the database
Username	SAPSSO SA SAPSA SAPSR3DB	These are the standard users which you can use to access the database server.
Password	Appl1ance	The initial password of the master system. Note that for solution provisioning in SAP Cloud Appliance Library the password is reset with the one provided when you create an instance.

OS Users and Groups

Name	Description
j2eadm	SAP system administrator
sybj2e	SAP database administrator
sapadm	SAP system administrator
sapsys	Group containing all <SID>adm users (should be a group in a central user storage like LDAP, NIS, or Active Directory)

Logon

Name	Description
<ol style="list-style-type: none"> Open a browser and connect to <a href="http://<IPAddressOfYourInstance>:50000/lama">http://<IPAddressOfYourInstance>:50000/lama Enter logon credentials: User: TRIALadmin Password: trial2016 (unless it was changed) Choose <i>Log On</i>. <p>i Note</p> <p>Please consider changing this password as soon as possible.</p>	

Name	Description
Same for the users TRIALoperator and TRIALreadonly .	
After login please continue with the User Guide that is available with this Trial Appliance.	

2 Licenses

Free Trial License Agreement

This solution can be used as a trial for the configured free period. Once you create the solution instance in SAP Cloud Appliance Library, the SAP system will generate a temporary license key that is sufficient for exploration purpose. After the expiration of the pre-installed temporary license the solution can't be continued.

3 Security Aspects

Be aware that creating your instances in the public zone of your cloud computing platform is convenient but less secure.

To conduct this preconfigured Demo only port 50000 (HTTP) of this instance needs to be accessible.

Protocol	Port	Description
HTTP	50000	Used for http connection to SAP Landscape Management

In addition, we also highly recommend that you limit the access to your instance

- either by defining a specific IP range in the Access Points settings, using [CIDR notation](#) or
- the more complex but secure alternative is to set up a virtual private cloud (VPC) with VPN access, which is described in [this tutorial on SCN](#).

The list below describes the ports opened for the security group formed by the server components of your solution instance:

In case you you need to access the operating system (OS) level, use the following information:

Protocol	Port	Description
SSH	22	Used for SSH connection to Linux-based servers

You must change the initial user passwords provided by SAP when you log onto the system for the first time.

4 Solution Provisioning in SAP Cloud Appliance Library

If you have a user in SAP Cloud Appliance Library, you need to meet the following prerequisites before starting to use the SAP Cloud Appliance library:

- Cloud Provider Configurations

You have a valid account in one of the cloud providers supported by SAP Cloud Appliance Library. If you already have an active cloud provider account, you can proceed directly with the next section. Otherwise, navigate to the cloud provider home page and sign up.

For more information about the supported cloud providers, see the [FAQ page](#).

- Navigate to SAP Cloud Appliance Library

Open the SAP Cloud Appliance Library in your Web browser using the following link: <https://cal.sap.com>

For more information about how to use solutions in SAP Cloud Appliance Library, see the official documentation of SAP Cloud Appliance Library (choose [Support](#) → [Documentation](#) link and choose  (expand all) button to see all documents in the structure). You can also use the context help in SAP Cloud Appliance Library by choosing the [Help](#) panel from the right side.
